

# Project Name: Wi-Fi Deployment at Agaramangudi & Purasaikudi Villages, Tamil Nadu – South India

## Location:

Agaramangudi & Purasaikudi Villages, Tamil Nadu – South India

## Description :

As a part of our World Wi-Fi day initiative, our initiative is to deploy Wi-Fi Hotspots with internet access in honor of India's Nobel Laureates – Sir C. V. Raman & Dr. Chandrasekhar at their ancestral villages in Tamil Nadu. (South of India).

It is remarkable that India does not have that many Nobel laureates and yet this tiny village has produced two and still has no internet connection to this date.

## Project Promoter:

Microsense Private Limited

## Project Objectives:

### Connecting the unconnected rural villages.

These villages have no internet Access or even a single broadband connection. People today have to travel many a miles to nearby towns to secure internet connectivity.

This initiative will bring more people online and thus result in real benefits to the villagers

## Finance:

The estimated total Project cost is USD 6300.

This includes all the equipment and labour hours to setup the hotspot base in 4 APs and 1 year of free access.

Microsense Private Limited is looking for partners to fund 50% of the project costs, a value around USD 3150
